What Is Blockchain?

A digital database of ledger that is distributed among the nodes of a peer-to -peer network.

As each transaction occurs, it is recorded as a "block" of data. Those transactions show the movement of an asset that can be tangible (a product) or intangible (intellectual)

Each block is connected to the ones before and after it. These blocks form a chain of data as an asset moves from place to place or ownership changes hands.

Transactions are blocked together in an irreversible chain: a blockchain Each additional block strengthens the verification of the previous block and hence the entire blockchain.

OUR MISSION

To connect people around the world with one another, and empower the life of millions of individuals by providing financial help. Everyone deserves a better life and they should have it now and M9 Club Foundation is here to ensure it with the unique binarical matrix programmed.

What is Crypto Currency??

Crypto currency, refers to digital or virtual currencies that use cryptography for secure financial transactions, control the creation of new units, and verify the transfer of assets. Unlike traditional flat currencies issued by governments.

Crypto currencies are decentralized and operate on a technology called blockchain Cryptocurrencies have gained significant attention and popularity due to their potential for decentralized and borderless transactions, the ability to bypass traditional financial intermediaries, and the possibility of investment opportunities.

What is Bitcoin??

Bitcoin is a cryptocurrency. It is a decentralized digital currency without a central bank or single administrator that can be sent from user to user on the peer-to-peer bitcoin network without the need for intermediaries.

- World's first cryptocurrency
- Invented and launched by Satoshi
- Nakamoto Launched On 09 Jan / 09
- Total Supply only 21M BTC (Limited)
- Mining Algorithm Used: POW (Proof Of Work) TPS : 7

An Idea About Polygon/Matic

There are many protocols competing to be the first interoperability solution for the DeFi ecosystem. Among them is Polygon, formerly known as Matic Network. Despite its early development and rebranding in February 2021, Polygon still maintains the MATIC ticker for its native utility token.

➢ Founders : Sandeep Nailwal, Jaynti Kanani, Anurag Arjun.
➢ The future of Web3 is built On Polygon Launched:
➢ February 20210
➢ Matic Coins Circulating Supply of 9.28
➢ Billion Total Supply of 10 Billion.
➢ Mining Algorithm:
➢ POS TPS: 65000

What is Smart Contract?

A smart contract is a digital agreement written in code, stored on a blockchain, and executed automatically without intermediaries.

Auto Re-Invest

In M when you sponsor on 4th position then current slot is full and after re-investment re-generate your new id under your sponsor and again same slot open for you with vacant places and 100% of the USDT Coins go to your sponsor's or up line's wallet.

Auto Re-Invest opens the same slot for you again and again, so you can earn USDT Coins again and again.

This way your referrals will also be auto re-invested and you can earn USDT Coins every time.
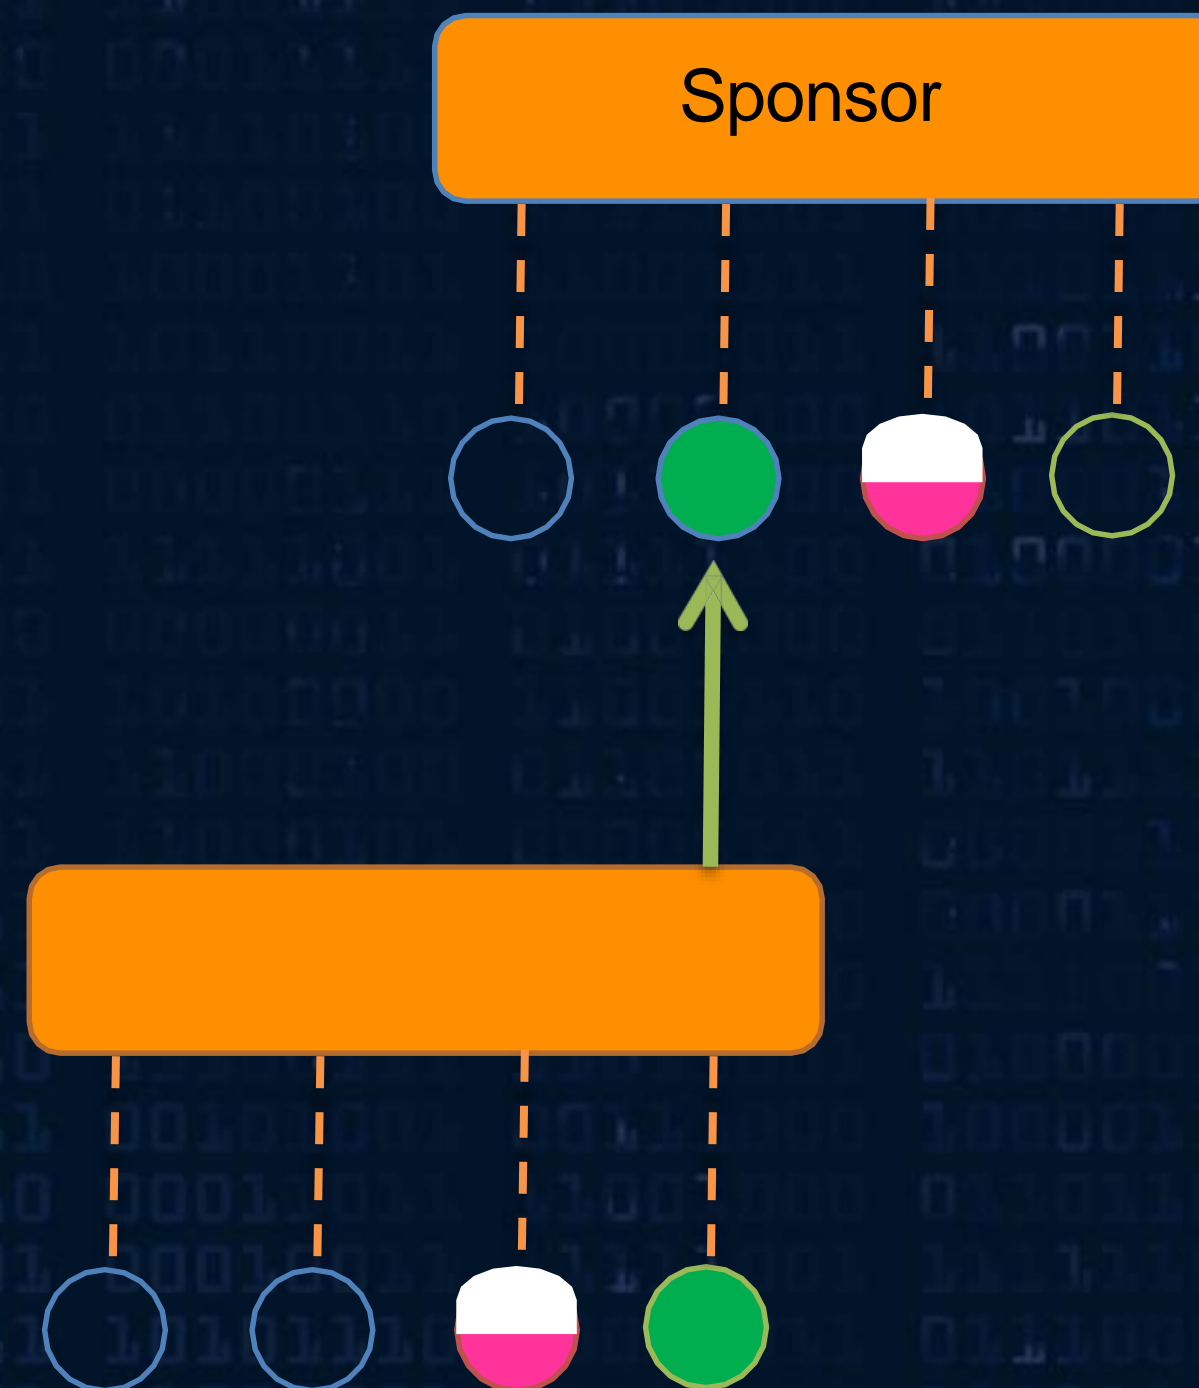

Sponsor

Auto Upgrade

UPGRADE — To get the income of the next slot, you need to upgrade the next slot only once and when you upgrade a new slot, your sponsor or upline gets 100% of the USDT Coins, provided that slot is upgraded by your sponsor.

The more slots you upgrade next, the more USDT

Coins you can earn. You decide whether to purchase the next level slot!

Re-invest of every slot and every cycle is done automatically. If you don't upgrade to the next slot after re-investing the first cycle of M , your M income will go to the System.

Whenever you upgrade a slot, your referral partner will take a place below you on the next re-invest and every time you take a place below you with each re- invest.

Slot 9

Slot 10
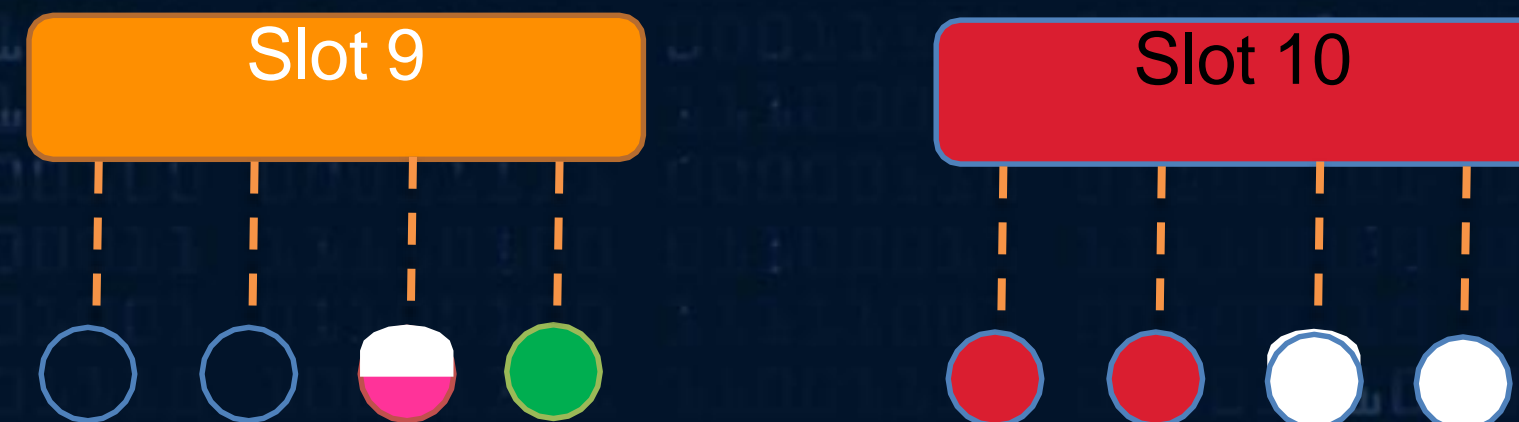

Lost Profit: The USDT Coin that you were supposed to get due to your not upgrading to the next slot will go to your sponsor or upline.

Extra Profit: You can get the USDT coin that your lower partner was supposed to get because he didn't upgrade the next slot.

Note : **In M it is necessary to upgrade the next slot after the first cycle is completed.**
